## WORKSHOP

# IMPROVING DRUG PRODUCT QUALITY WITH ADVANCED TECHNOLOGY

THURSDAY 7<sup>TH</sup> OCTOBER - H 11:00/12:30

**Efficacy and safety is a prerequisite for pharmaceutical products** and manufacturers must meet and maintain the defined quality standards. Organizations are very often burdened with cumbersome activities to execute and document the related processes. Traditionally, **Quality Management and Quality Control are paper-based and disconnected**, the workflows are time consuming and error-prone. Users are struggling to access, aggregate and use the data for documentation and reporting. Data silos and a lack of data contextualization are hindering meaningful analytics that are required to optimize the manufacturing processes to produce high quality medicines at high yield and low costs.

**In this presentation we will discuss how digitalization and advanced technology like a scientific business platform can help organizations** to increase efficiency and reduce costs while ensuring regulatory compliance.

**We will share examples of companies who have been able to ensure drug product quality and speed time to market by improving their laboratory, quality and manufacturing processes.**

### SPEAKERS

**Daniela Jansen** - BIOVIA Product Marketing Director

**Domenico Palumberi** - Life Sciences Solution Consultant

**Emmanuele Puricelli** - Life Sciences Expert

## PROGRAM

- 11:00-11:10 - **Workshop introduction**  
**Emmanuele Puricelli, Life Sciences Expert**
- 11:10-12:00 - **Improving Drug Product Quality with Advanced Technology**  
**Domenico Palumberi, Life Sciences Solution Consultant**  
**Daniela Jansen, BIOVIA Product Marketing Director**
- 12:00-12:30 - **Q&A**

**Participation is free upon registration for AFI and non-AFI Members.**

**Deadline registration: the online registration will be available until 5 pm of the day before the webinar.**

### **Promoter: Dassault Systèmes, the 3DEXPERIENCE Company**

Dassault Systèmes, the 3DEXPERIENCE Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual twin experiences' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production. Powered by the 3DEXPERIENCE® platform, BIOVIA™ provides global, collaborative product lifecycle experiences to transform scientific innovation.
